10 October 2025

To whom it may concern,

I am pleased to recommend **Andrei Tregubov**, with whom I worked for more than five years at the Institute of Applied Physics of the Russian Academy of Sciences. Throughout our collaboration, Andrei demonstrated a consistently high level of analytical and technical competence, remarkable independence, and a strong ability to handle complex applied mathematical and data-driven tasks. His **performance was always to our fullest satisfaction**, and he carried out his responsibilities **always extremely well**, consistently producing results of exceptional quality.

It is particularly noteworthy that Andrei already has strong scientific publications indexed in Scopus, which is an uncommon achievement for someone at such an early stage of their career. This reflects both his ability to work at a high professional level and his strong sense of responsibility in research tasks. His contributions were substantial, reliable, and insightful, often exceeding what would typically be expected from a junior researcher.

In his work, Andrei processed large and heterogeneous datasets, developed and verified robust numerical procedures, and identified and resolved methodological issues independently. His approach was always characterized by precision, thorough verification of results, and careful attention to detail. In all aspects of his work, **he proved to be extremely reliable**, consistently delivering high-quality results and maintaining excellent standards in every task he undertook.

Andrei writes clean, reproducible, and well-structured code, works with exceptional accuracy, and shows a strong ability to understand the theoretical principles behind the data he analyzes. He requires minimal supervision, communicates clearly and professionally, and performs his tasks **far above expectations**. His cooperation with colleagues and supervisors has always been exemplary, and he integrated seamlessly into our research environment.

I confidently and without any reservation recommend Andrei Tregubov for positions involving data analysis, algorithm development, numerical modeling, and research and development engineering. He is a highly capable and promising specialist whose technical maturity, diligence, and reliability make him a valuable addition to any team.

Sincerely,

Ekaterina Didenkulova,

Associate Professor, PhD, Senior Researcher in Institute of Applied Physics, Russian Academy of Sciences
